

## **Alzheimer's Disease**

Alzheimer's disease is a disease of the brain. It makes people very forgetful and is caused by chemical changes in the brain. There is no test that can tell if a person has Alzheimer's disease. Some signs of Alzheimer's disease include:

- Forgetting things that just happened
- Asking the same question over and over
- Forgetting your name or the names of family
- Getting lost in familiar places
- Forgetting where you live or how to get home
- Having trouble shopping or cooking a meal
- Forgetting to take a bath or put on clean clothes
- Having trouble finding the words to say what you want to say
